Pollution Prevention P2

A guide to the P2 services
offered by the
Environmental Protection
Commission
of
Hillsborough County

Saving the environment and money at the same time

What is P2?

Pollution Prevention or P2 is the act of reducing or eliminating waste at the source, **BEFORE** it is generated. Implementing P2 can benefit your business in **CONSIDERABLE** ways...

Benefits to your business

You save money... through increased efficiency, the use of fewer raw materials, better process operation, and less disposal costs.

Your prestige is boosted...

as a good environmental neighbor and steward.

Non-regulatory...

Implementation of suggestions is voluntary.

Solvent Distillation Unit

What we can do for you

Our team of experts will provide you with **free** Pollution Prevention techniques that can reduce or eliminate waste.

We will meet **with you** to discuss Pollution Prevention opportunities and help you determine **your** needs.

Then we will work together to meet **those** needs and help you develop and implement a specific, realistic action plan with **clear, measurable** objectives.

It is a true partnership, a long-term relationship that will pay **big** dividends.
